PROFESSIONAL SUMMARY

AI Engineer with 2+ years of experience building and deploying AI-powered applications using Python, LangGraph, Claude API, FastAPI, and Retrieval-Augmented Generation (RAG). Experienced in developing enterprise copilots, integrating external APIs, implementing tool-calling workflows, and deploying solutions on Azure. Skilled in LLM application development, vector databases, prompt engineering, SAP integrations, and production monitoring using LangSmith.

CORE COMPETENCIES TECHNOLOGY

AI LLM Development: LangGraph, LangChain, Claude API, OpenAI GPT-4, Tool Calling, Structured Outputs, Prompt Engineering, Retrieval-Augmented Generation (RAG), LangSmith (Tracing Monitoring)

Backend Development: Python, FastAPI, REST APIs, Pydantic, JSON, Async Programming, API Integration

Search Retrieval: ChromaDB, Pinecone, Vector Embeddings, Semantic Search, Document Chunking, Knowledge Base Retrieval

SAP Integration: SAP BTP, SAP Integration Suite, SAP Cloud Integration (iFlows), SAP API Management, OAuth 2.0, REST API Integration

Cloud Infrastructure: Azure App Service, Azure Bot Service, Azure OpenAI, Docker, PostgreSQL, GitHub Actions, Git

EXPERIENCE

LTIMindtree

Agentic AI Engineer

Jan 2024 – April 2026

Pune, India

- **AI Procurement Copilot (LangGraph + Claude API + SAP BTP):** Developed and deployed an AI-powered procurement copilot for Microsoft Teams using LangGraph, FastAPI, Claude API, and SAP BTP integrations. Enabled users to retrieve purchase order status, vendor details, and delivery information through natural language queries, reducing manual effort for procurement teams.
- **Agent Workflow and Tool Calling:** Built LangGraph-based workflows to process user requests and invoke SAP APIs through dedicated tool functions. Implemented structured tool inputs and outputs using Pydantic models, improving reliability and reducing API validation issues during execution.
- **Knowledge Base and RAG Implementation:** Implemented Retrieval-Augmented Generation (RAG) capabilities using procurement documents, embeddings, and vector search. Enabled the copilot to answer policy and process-related questions by retrieving relevant document chunks and providing grounded responses.
- **Monitoring and Optimisation:** Utilized LangSmith tracing and application logs to monitor LLM interactions, tool executions, response latency, and token usage. Improved prompt design and context management to reduce unnecessary token consumption and improve response quality.
- **SAP BTP Integration:** Integrated SAP systems using SAP Integration Suite and iFlows to securely expose procurement data through APIs. Managed authentication and API communication from FastAPI services, enabling seamless retrieval of enterprise data for agent workflows.

PERSONAL PROJECTS

AI-Powered IT Helpdesk Email Automation | *Make.com, Claude API, Email Automation*

- Designed an AI-driven email triage workflow using Make.com and Claude API to automatically analyze incoming support requests and classify tickets based on category, priority, and business impact.
- Automated ticket routing, notification workflows, and support team assignment, reducing manual effort and improving turnaround time for routine helpdesk operations.

Multi-Agent Market Research & AI Use Case Generator | *LangGraph, LangChain, Gradio, Tavily API, Claude API*

- Designed a **four-node LangGraph graph** – Research Agent (Tavily web search), Analyst Agent (LLM-synthesised competitor intelligence), Use Case Agent (industry-specific AI/ML solution generation), and Writer Agent (structured Markdown report output) – with a Supervisor node coordinating parallel execution of Research and Analyst branches before merging into Use Case and Writer steps.
- Implemented **semantic deduplication** across agent outputs using Chroma embeddings to suppress redundant recommendations; exposed the full pipeline as a **Gradio** interface with streaming agent status updates and one-click Markdown export; reduced manual business development research from 6 hours to under 12 minutes per industry domain.

EDUCATION

DIT University

B.Tech in Computer Science Engineering (CGPA: 7.67)

Aug 2019 – Jul 2023

Dehradun, Uttarakhand

ACHIEVEMENTS

LTIMindtree SuperCrew Award for Excellent Performance — Feb 2025
